

Harsh Kumar

Full Stack Developer — AI/LLM Applications

[🐙 Harsh-v01](#) | [🌐 harsh015](#) | [✉ contactharsh15113@gmail.com](#)

[📞 +91 73856 20401](#) | Pune, Maharashtra

SUMMARY

Full-stack developer (React, Node.js, FastAPI) who builds and deploys end-to-end apps with **RAG pipelines, real-time features, and REST APIs**. Shipped **3 projects**, led a **3-member team** to a **Best Departmental Project Award**, and built LLM retrieval workflows during an **AI/LLM internship at HCLTech**. B.Tech IT graduate (CGPA **8.03**).

TECHNICAL SKILLS

Languages	Python, JavaScript, C++, SQL
Frontend/Backend	React, Node.js, Express.js, FastAPI, REST APIs, Socket.IO
Databases	MySQL, MongoDB, Firebase
AI/ML	RAG, LangChain, Embeddings, Vector Search (ChromaDB), Prompt Engineering
Cloud & Tools	Vercel, Railway, Git, GitHub
Core CS	DSA, OOP, DBMS, Operating Systems, Computer Networks

EDUCATION

2022 – 2026	B.Tech in Information Technology, MIT ADT University, Pune	CGPA: 8.03
2021	Class XII, Kendriya Vidyalaya Southern Command, Pune	85.8%
2019	Class X, Kendriya Vidyalaya Southern Command, Pune	91.2%

EXPERIENCE

HCLTech	Mar 2026 – Apr 2026
<i>AI / LLM Developer Intern</i>	

- **Built** a **LangChain and ChromaDB** retrieval workflow to automate document analysis, cutting manual data extraction from **~10 min** to **~1 min** per document across **25 test documents**.

PROJECTS

DocuMind – RAG-Powered PDF Assistant	🐙 GitHub 🔗 Live Demo
<i>React, Python, FastAPI, LangChain, ChromaDB, Hugging Face, Groq, Gemini</i>	

- **Built** a RAG app to chat across **multiple PDFs** through a **5-stage pipeline** (extraction, token-based chunking, embeddings, **ChromaDB** storage, **top-3** retrieval), answering in **under 5 seconds** on 100+ page documents.
- **Designed** a FastAPI backend with **7 REST endpoints** for PDF processing, semantic search, vector-store inspection, and chat, with switchable **Groq and Gemini** LLM providers.
- **Engineered** a conversational **React** interface for querying multiple PDF documents using semantic retrieval.

Certify – Certificate Generation & Verification Platform	🐙 GitHub 🔗 Live Demo
<i>React, Vite, Node.js, Express.js, MySQL, PDFKit, QRCode, XLSX</i>	

- **Built** a certificate platform that bulk-generates **500 PDFs from CSV/Excel into one ZIP** in **under 60 seconds**, each with a unique ID and **QR-based public verification**.
- **Designed** MySQL-backed REST APIs for creation, search, downloads, and **VALID/REVOKED** lifecycle management; deployed live across **3 services**: Vercel, Railway, and Aiven.
- **Implemented** individual PDF and **bulk ZIP** downloads with **server-side validation** on every upload.

Samvad – Real-Time Assistive Communication App	🐙 GitHub 🔗 Live Demo
<i>React, JavaScript, Node.js, Express.js, Socket.IO, Firebase</i>	

- **Built** a real-time chat app with **Socket.IO** and Firebase featuring live messaging, online presence, and typing indicators, tested with **10+ concurrent users**.
- **Integrated** multilingual **translation, speech-to-text, and text-to-speech** so users can hold accessible conversations without typing.
- **Led** a **3-member team** to delivery, winning the **Best Departmental Project Award**.

ACHIEVEMENTS

Smart India Hackathon 2024	Top 30 teams in the AI/ML category.
E-Conjecture Hackathon – IIM Indore	Selected as a Finalist .
Best Departmental Project Award	Won for <i>Samvad</i> ; led a 3-member team .

CERTIFICATIONS

Information Technology Specialist in Databases (Certiport) Python for Data Science (IBM) AWS Academy Cloud Foundations
Career Essentials in Generative AI (Microsoft & LinkedIn) Querying Databases with SQL (Coursera)
